GALVANIZED STEEL ROLLERS

Edging roll

1. Cutting and deburring

After cutting to the ordered length of the roller edges are graded.
On request, we can finish the edges in one of the ways shown below.

Cutting and standard stage

2. Radiused

Roller diameter ØD [mm]	Stage x [mm]	Angle	Radius R [mm]
Ød ≤ 10	1	15°-20°	1
10 < Ød ≤ 30	1,5	15°-20°	1
30 < Ød ≤ 80	2,5	15°-20°	1

Production lines fixed and mobile
available in diameters of 30 and 35mm
length from 400 to 1000mm with
different edges and the possibility
turning and milling

3. Cutting and stage 45°

There is also the possibility of stage 45°.

Additional sample

Below there is some example of additional processing line roller

The internal thread in the axis of roller

Completion of roller turned

External thread .

Groove rolled the snap ring

Completion of roller with the surface polished

PULLEYS CAST IRON

Pulleys cast iron, made the trapeze harness, designed for the transport of ceramic tiles on the enamel lines. They are available in fixed version, with a hole for a screw without a head, to be mounted directly on the shaft diam 30 and diam 35, and a mobile unit, with a hole designed for bearing diam 62/30 and 68/35

Fixed pulley

COD	D PULLEY [mm]	type	D	F	F1	G	M	S	S1
PL11DB170X1/F35	170	B	180	30/35	M10	156	75	32,4	20,4

PL12DB250X1 / F68	250	B	4	23	62/68	261	231	29,0	29,0
PL12DC250X1 / F68	250	C	6	27	62/68	261	223	29,0	29,0

PLASTIC PULLER

A good alternative to cast iron pulleys, especially in wet areas are wheels with a thermoplastic resin.

Benefits:

low weight Weight plastic wheels is reduced by 60% resulting in lower transportation costs, less strain and easier job for entire path, with a longer service life. High resistance to dirt Thermoplastic resin enamel prevent sticking during operation thereby reducing the number of interventions in particular on the enamel line. Chemical inertness also prevents the resin sticking to the belt surface of the wheel.

Increased life

Thanks to its characteristics, wheels with thermoplastic resin in standard use are more durable than cast iron wheels. Lack of maintenance Wheels with a thermoplastic resin do not corrode, and do not need to be re-painted since the resin itself is colored. No effect to substances transported The wear of the wheels has a negligible impact for substances transported on the line (in particular the enamel line) Plastic wheels available as a mobile or fixed bearing shaft diam 30 and diam 35, of the wedge belt A-B-C

BEARINGS AND BEARING HOUSINGS

Bearings UC 206, UC 207, UC 208 for installation in cast iron pulleys. Bearing UCP 206 UCP 207 UCP 208 for mounting kits drive division lines.

Rollers for roller stoves dimensions 8X45X12 / 15, 8X52X12 / 15, 8X58X12 / 15, 10X45X12 / 15, 10X52X12 / 15, 10X58X12 / 15
